

***In vitro* cytotoxicity and *in vivo* efficacy, pharmacokinetics and metabolism of 10074-G5, a novel small-molecule inhibitor of c-Myc/Max dimerization**

Journal of Pharmacology and Experimental Therapeutics

FIG. 1.

FIG. 1. *In vitro* growth inhibition of 10074-G5 and 10058-F4 against HL-60, a myelocytic leukemia cell line, determined using MTT assay at 72 h. The data points are mean \pm SD of 3 wells/concentration, and curves are the best fit to the data using the Hill equation.
