Stereoselective Effects of 4-Hydroxynonenal in Cultured Mouse Hepatocytes

Michael J. Dabrowski,[†] Joseph K. Zolnerciks,[†] Larissa M. Balogh,[†] Robert J. Greene,[‡] Terrance J. Kavanagh,[§] and William M. Atkins^{*†}

Fig. S1

Effects of racemic HNE and the ethyl ester of the glutathione conjugate of HNE (GSHNE-EE) on colony formation. Cells were treated as described in “Experimental Procedures” of the accompanying manuscript. Racemic HNE (open squares) and GSHNE-EE (closed squares).
