Supplementary Figure 1. Multiple alignments of full-length Spt6, Tex and Iws1 proteins. *ec*, *Encephalitozoon cuniculi*; *sc*, *Saccharomyces cerevisiae*; *hs*, *Homo sapiens*; *pa*, *Pseudomonas aeruginosa*. Sequence similarities are indicated by shading. End of sequences are marked with a ‘*’. (A) Multiple sequence alignment of *ec*, *sc*, *hs* Spt6 and Spt6 bacterial paralog *pa*Tex. The specific conserved region at the N-terminus of Spt6 (Spt6N) is indicated with a red box. The structural domains of Tex as well as the Spt6-specific tandem SH2 domains are indicated underneath the sequences. (B) Multiple sequence alignment of *ec*, *sc*, *hs* Iws1. The region sufficient for the essential function of Iws1 in yeast is underlined.

A

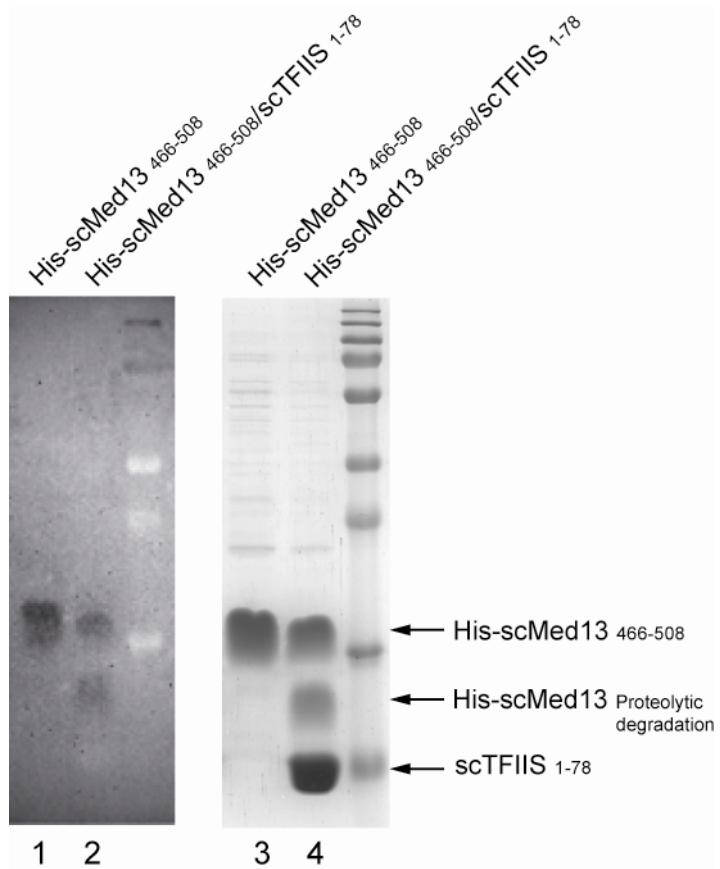

B

Supplementary Figure 2. Effect of K90 mutants on *E. cuniculi* Iws1 stability and Spt6N binding.

(A) Biophysical characterization of *E. cuniculi* Iws1 wild-type (WT) and K90 mutants using the Thermofluor technology. For each protein, the fluorescence observed upon binding of the SYPRO orange dye to the protein is plotted versus the temperature. (B) Effect of K90 mutations on formation of the complexes between *ecIws1*₅₅₋₁₉₈ and *ecSpt6N*₅₃₋₇₁ or *ecSpt6N*₁₋₇₁. The K90D mutant migrates more slowly (lane 10).

Supplementary Figure 3. A C-terminal degraded fragment of *scMed13* is solubilised upon binding to TFIIS.

Upon co-expression of His-*scMed13*₄₆₆₋₅₀₈ with *scTFIIS*₁₋₇₈, a small protein is observed, bound to the affinity resin, which does not migrate at the expected molecular weight of His-*scMed13*₄₆₆₋₅₀₈ and *scTFIIS*₁₋₇₈ (right panel; Coomassie-stained SDS gel). A western blot analysis (left panel) using an anti-polyhistidine antibody shows that this protein is his-tagged and corresponds most likely to a C-terminal degradation of His-*scMed13*₄₆₆₋₅₀₈ which is solubilised through its interaction with *scTFIIS*₁₋₇₈.

Supplementary Table I. Data collection and refinement statistics for *E. cuniculi* Iws1₅₅₋₁₉₈

Data collection statistics				
Data sets	Native	Se-Met λ1 peak	Se-Met λ2 inflection	Se-Met λ3 remote
