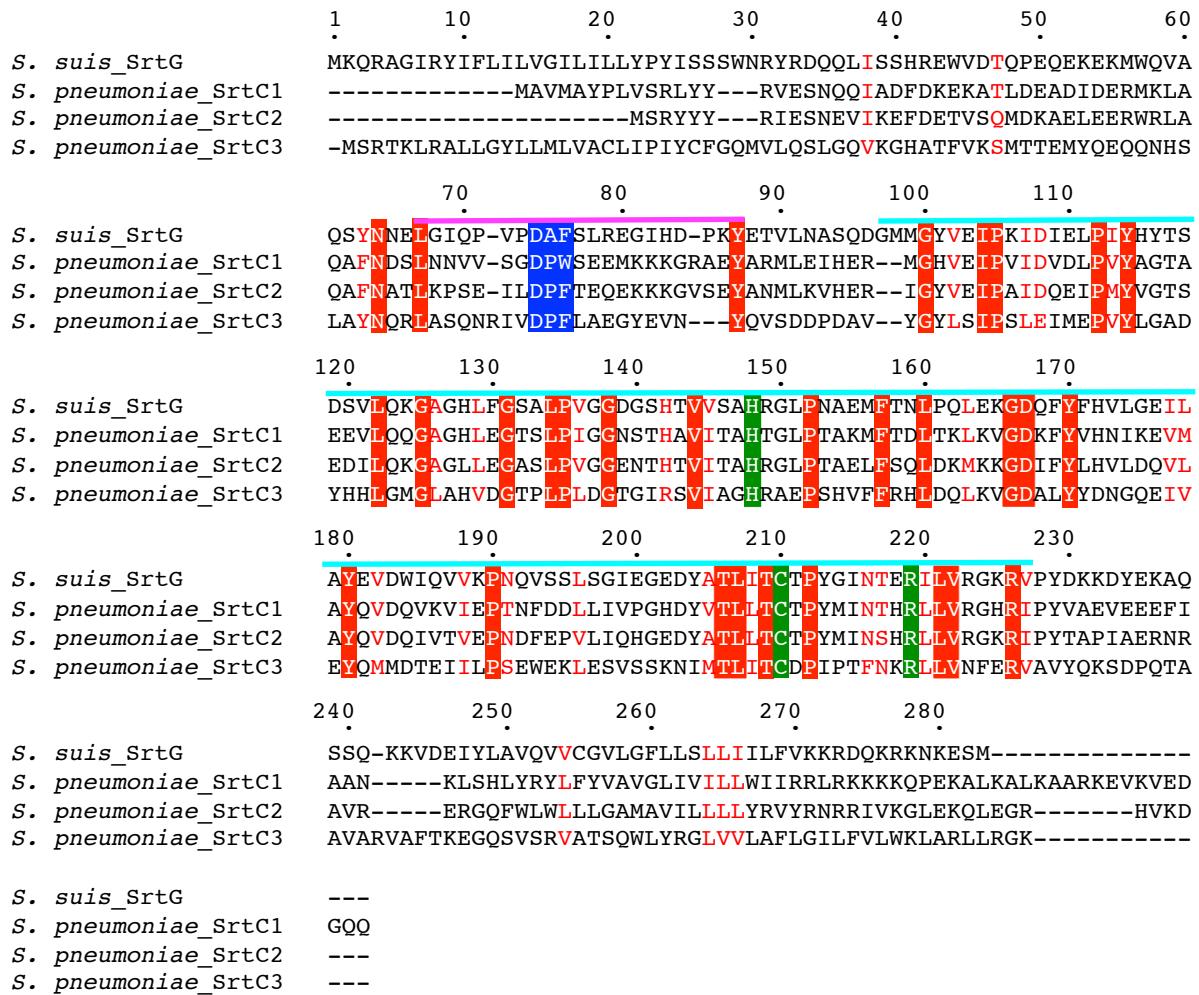

FIG. S1. Amino acid sequence alignment of the SrtG and the three class C sortases in the pneumococcal *rLR* pilus islet (SrtC1, SrtC2, and SrtC3). Identical residues are shown with a red background, whereas similar residues are shown in red. The class C sortase domain regions are shown in cyan line, and the catalytic active site are highlighted in green. The lid regions of *S. pneumoniae* are shown in magenta line, and the lid anchor residues are highlighted in blue. The GenBank accession numbers of the listed proteins are follows: SrtC1, AAK74626; SrtC2, AAK74627; SrtC3, AAK74628.
