

Supplementary Table 1

Brain Regions That Are Jointly Associated With Greater Positive Functional Connectivity With the Posterior Cingulate and Systolic Blood Pressure Reactivity. Next to each left (L) and right (R) region and approximate Brodmann area (BA) are the MNI coordinates (for the peak voxel in each cluster), where x = right (+) to left (-); y = anterior (+) to posterior (-); z = superior (+) to inferior (-). The clusters in the tables are driven from a whole brain exploration study. T-values for voxels of peak activation and their corresponding cluster extents were derived from a mixed-effects analysis employing an uncorrected height threshold of $p < 0.005$ and extent cluster threshold of $k = 20$ voxels.

Side	Region	Brodmann	MNI Coordinates			Number of voxels	Peak
		Area	X	Y	Z	in region	<i>t</i> value
L	Cuneus	17/18	-12	-102	-2	4291	4.86
