

Table 3. Positive predictive value (PPV) and negative predictive value (NPV) of PB viral load measurements and hearing outcome in children with asymptomatic congenital cytomegalovirus infection at three different age ranges.

Age Range	PB Viral Load ge/mL	Hearing Outcome		PPV, % (CI)	NPV, % (CI)
		SNHL	Normal		
		<2 months	≤3,500		
	>3,500	3	35		
2-12 months	≤3,500	0	26	7.7 (0.95-25.1)	100 (86.8-100)
	>3,500	2	24		
12-36 months	≤3,500	0	25	11.8 (1.5-36.4)	100 (86.3-100)
	>3,500	2	15
