

Supplementary Figure 1

Supplementary Figure 1. ^1H - ^{15}N HSQC spectra of ^{15}N -labelled A β (1-40) titrated with GM1. Spectral data were obtained using 0.2 mM A β (1-40) proteins uniformly ^{15}N -labelled (black) or selectively ^{15}N -labelled at Val³⁹ (green) or Val⁴⁰ (red). A β /GM1 molar ratios were (A) 1:0, (B) 1:2, (C) 1:5, (D) 1:15, (E) 1:20 and (F) 1:30.
