^aAs reported for fasting glucose for $n=45,049\text{--}76,558$ in Dupuis et al. [1]

^bThe HUFS dataset used to estimate power is based on $n=927$

^cNot available in HUFS for direct replication

^dAfrican-American panels from Perlegen (AFD_AFR) and HapMap (ASW) were used as alternative datasets to estimate power
