Supplemental Figure 3. The color version of Figure 5, describing the increased apoptotic hepatocytes in Null-HFD mice. Apoptotic hepatocytes were detected by using the ApopTag® peroxidase in situ apoptosis detection kit. Black arrows (D) indicate TUNEL-positive hepatocytes in 20 high power fields (X400). Values represent means \pm S.E.M., $n=4$ or 3 (WT-STD). *, significantly different from the corresponding WT group, $P=0.05$. +, significantly different from Null-STD, $P=0.05$.
