

Supplementary Table S1. Anti-HVR1 antibodies neutralize chimeric HCVpp infection

HCVpp harbouring WT H77c E1E2 or H77c E1E2 with the Gla, HG or GH HVR1 (see main text) were incubated with a range of concentrations of anti-HVR1 antibodies and the IC₅₀ values ($\mu\text{g ml}^{-1}$) were determined as shown.

Antibody	HCVpp			
	H77c	H77c- GlaHVR1	HG	GH
AP123	>30	1.5	9	>30
R1020	1.5	7	15	2.5
R140	15	1	2	20
