Supplementary Table 2 Comparison of *Retn* transgene and endogenous *Retn* gene expression in epididymal fat isolated from transgenic and control SHR

	Transgenic <i>Retn</i> in fat from young vs. old rats	Endogenous <i>Retn</i> in fat from young controls vs. young transgenics	Endogenous <i>Retn</i> in fat from old controls vs. old transgenics
Expression ratio	0.56	1.19	1.06
P value	0.80	0.84	0.93

Expression ratios were calculated from mean values (N=5 per group). See methods section for column definitions and description of the statistical analysis.

Supplementary Table 3 Significantly differentially expressed Illumina tags in epididymal fat isolated from 6 week old SHR-*Retn* transgenic rats versus age-matched controls.
