

Figure S2. *CNE2/3* directs reporter gene expression in the neural tube and dorsal root ganglia at E11.5.

Ventral, lateral and dorsal views of three transgenic embryos of *CNE2/3-pHsp68-lacZ* construct. (A) *lacZ* expresses strongly in the hindbrain, neural tube and dorsal root ganglia. (B) *lacZ* expression in the neural tube, dorsal root ganglia and also the dorsal medial regions of the telencephalon, diencephalon and midbrain. (C) *lacZ* expression in the neural tube and dorsal root ganglia. Scale bar denotes 1 mm in length.
