

Figure S4. *CNE7* directs reporter gene expression in the hindbrain and neural tube at E11.5.

Ventral, lateral and dorsal views of two transgenic embryos of *CNE7-pHsp68-lacZ* construct. (A) *lacZ* expression in the hindbrain and neural tube. (B) *lacZ* expression is observed not only in the hindbrain and neural tube, but also ectopically in the liver and stomach. Scale bar denotes 1 mm in length.
