

Figure S7. *CNE10* directs reporter gene expression in the midbrain, hindbrain and neural tube at E11.5.

Ventral, lateral and dorsal views of two transgenic embryos of *CNE10-pHsp68-lacZ* construct that exhibit *lacZ* expression. (A, B) *lacZ* expression was observed in the midbrain, hindbrain and neural tube for both embryos with additional ectopic expression in the eye for (A) and additional expression in the heart for (B). Scale bar denotes 1 mm in length.
