

TABLE S11. Generalized linear models of extinction risk against species richness, taxon age and diversification (genera endemic to the Cape of South Africa), weighted by number of listed species within each genus (compare with Table 1, main text).

model	AIC	explanatory variable(s)	coefficient(s)	z	p-value
1	800.73	species richness	0.60	9.20	<0.001
2	755.04	taxon age	-0.40	-10.81	<0.001
3	791.38	diversification rate	0.00	9.72	<0.001
4	727.57	species richness	0.38	5.36	<0.001
		taxon age	-0.32	-8.30	<0.001
