

Table S1. Results (mean, 95% HPDs, and root mean squared error (rMSE)) of leave-one-out analyses in which leaf ages were estimated for 85 Dengue sequences of known sample isolation time.

Sequence ID	<u>Years prior to most recent sample (2002)</u>		<u>Year</u>		rMSE
	True Age	Mean (95% HPD)	True Age	Mean (95% HPD)
