Supplementary Figure 1. Scatterplot showing a positive correlation between right amygdala-dmPFC functional connectivity and state anxiety ( $r=0.736$ ,  $p<0.001$ ). Functional connectivity values are taken from the dmPFC voxel cluster defined in Figure 2. We note that this scatterplot was presented only for visual purposes.

Supplementary Figure 2. Scatterplot showing a negative correlation between right amygdala-vmPFC functional connectivity and state anxiety ( $r=-0.71, p<0.001$ ). Functional connectivity values are taken from the vmPFC voxel cluster defined in Figure 2. We note that this scatterplot was presented only for visual purposes.
