

Supplementary Data

SUPPLEMENTARY FIG. S1. Representation flow cytometric analyses of donor cell engraftment 8 weeks after primary transplantation as described in Figure 4.

SUPPLEMENTARY FIG. S3. Representation flow cytometric analyses of donor cell engraftment 12 weeks after secondary transplantation as described in Figure 5.

SUPPLEMENTARY FIG. S2. Representation flow cytometric analyses of donor cell engraftment 20 weeks after primary transplantation as described in Figure 4.

SUPPLEMENTARY FIG. S4. Representative flow cytometric analyses of apoptosis in the progeny of Lin⁻c-kit⁺Sca1⁺ (LKS⁺) cells after ex vivo expansion as described in Figure 6A.
