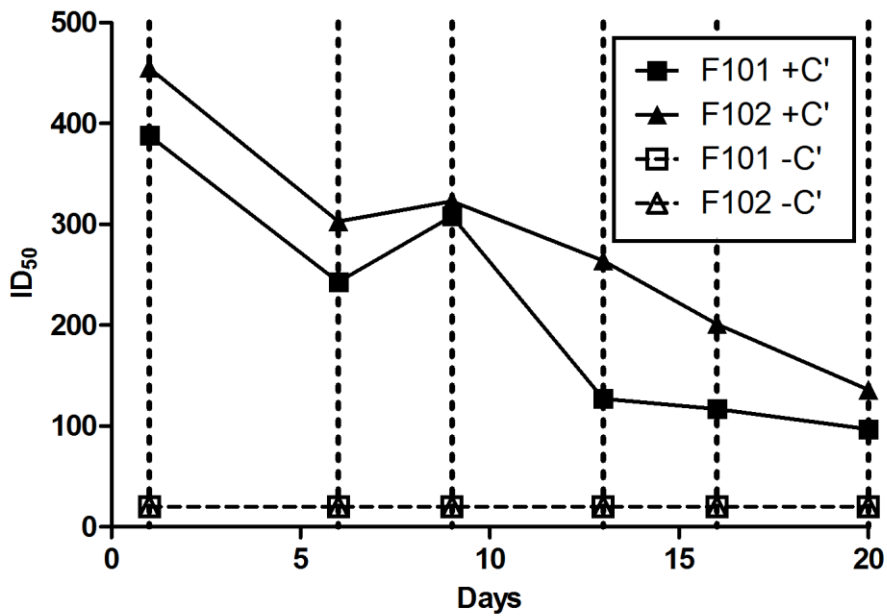

FIG. S4. Antigen specific serum antibody levels after transfer of immune serum to naive macaques F101 and F102. (A) Anti-C8166-CCR5 IgG at a 1/320 dilution (MFI). (B) Neutralization titers against SHIV-SF162P4/C (ID₅₀) in the presence (+C') or absence (-C') of complement. Vertical dotted lines indicate i.v. SHIV-SF162P4/C challenges.
