

SUPPLEMENTARY DATA

FIG. S1. Relationship between up-/down-regulated genes in the *rad* mutant and aerobic-/anaerobic-expressed genes. $\text{Log}_{2.5}$ values were calculated from our data (*rad* mutant/WT) and Narsai *et al.* (anaerobic/aerobic; 2009, *Plant Physiology* **151**: 306–322). All the selected genes in our microarray are plotted in the graph.
