

1 **Table S1.** Green (G), yellow (Y), and total (Tot.) CFU ml⁻¹ enumerated on TCBS agar (rounded to two significant digits or a maximum of two decimal places) and the
 2 temperature (T), salinity (S), dissolved oxygen (D.O.), turbidity (Turb.), and pH at each station (Sta.) on each of the four main samplings dates (n.d. = no data due to equipment
 3 malfunction). The sum of green and yellow colonies does not exactly agree with total colonies in some cases as a result of independent rounding of the total values.

Sta.	2005 October 11						2006 January 27						2006 March 28						2006 September 01
