^aMultiple alleles which differ from one another only outside the coding region make up these groups. Due to space constraints, accession numbers are listed for one variant only.

All *Mafa* MHC class II alleles identified in this study were compared with those available in GenBank. Those which perfectly matched previously identified alleles for which the entire coding sequence was known are listed here. “Animal origin” indicates the origin of all animals in which the allele was detected in this study. “Both” denotes alleles found in the Indonesian and Vietnamese cohorts. Previously documented origin information was taken from the corresponding publication(s) and/or Genbank record(s). The abbreviations used were In=Indonesia, Ch=China, Ma=Mauritius, Ph=Philippines, Vi=Vietnam, Unk=Unknown. Mauritian haplotypes are indicated in parentheses. References for accession numbers are (1) O'Connor et al. 2007, (2) Sano et al. 2006, (3) Doxiadis et al. 2006, (4) unpublished, various sources, (5) Aarnink et al. 2010, (6) Leuchte et al. 2004, (7) Blancher et al. 2006, (8) Gaur and Nepom 1996.

Supplemental Table 2 Nucleotide sequences from other macaque species identical to novel *Mafa* alleles

<i>Mafa</i> allele name	<i>Mafa</i> accession #	Animals	Animal origin (<i>Mafa</i>)	Identical sequence from other macaque species	Accession # of identical sequence

^aAvailable sequence limited to exon 2

^bAllele not officially named. Lineage inferred based on alignment with available sequences.

Novel *Mafa* alleles were compared to MHC class II sequences from other macaque species available in GenBank. Nucleotide-identical sequences are listed here. “Animal origin” indicates the origin of all animals in which the allele was detected in this study. “Both” denotes alleles found in both the Indonesian and Vietnamese cohorts. References for accession numbers are (1) Otting and Bontrop 1995, (2) Giraldo-Vela et al. 2008, (3) unpublished, various sources, (4) Sauermann 1998, (5) Kenter et al. 1992, (6) Christ et al. 1994, (7) Qiu et al. 2008.
