

Table S1. Validation of gain and loss correct choices with optimal choice (correlation coefficients; * $p < .05$, ** $p < .01$, *** $p < .001$, two-tailed, $N = 75$; related to Table 2).

	<i>Gain percent choices</i>	<i>Loss percent choices</i>
Gain optimal choices	0.92***	0.08
Loss optimal choices	0.03	0.71***
