

Fig 1 Tx-censored Kaplan-Meier survival of significant RRF (>100 ml/day) during incremental PD or HD

	at RRT initiation (number of patients)	at Tx
PD	2 liters once daily (5)	2 liters twice daily (3)
	2 liters twice daily (5)	2 liters thrice daily (2)
	10 liters nightly APD (5)	2 liters 4 times daily (1)
	15 liters nightly APD (2)	10 liters nightly APD (1)
		15 liters nightly APD (4)
		20 liters nightly APD (4)
		25 liters nightly APD (1)
		22 liters CCPD (1)
HD	3 hours twice weekly (5)	3 hours thrice weekly (1)
	3,5 hours twice weekly (3)	3,5 hours thrice weekly (4)
	3 hours thrice weekly (6)	4 hours thrice weekly (17)
	3,5 hours thrice weekly (8)	4 hours 4 times a week (2)
	4 hours thrice weekly (2)	

Table 4 Dialysis dose at the beginning of RRT and at transplant time
