

Supporting information for:

Spatial but not Temporal Co-divergence of a Virus and its Mammalian

Host

FERNANDO TORRES-PÉREZ, R. EDUARDO PALMA, BRIAN HJELLE, EDWARD
C. HOLMES, JOSEPH A. COOK

Table S1. Sampling localities, numbers in Figure 1, number of sequences (N), and
coordinates (in decimal degrees) for Andes virus (ANDV) and *O. longicaudatus* (OL)

Locality	ANDV Map number	ANDV (N)	OL Map number	OL (N)	Latitude	Longitude
Fray Jorge	1	2	1	10	-30.64	-71.68
Los Vilos	2	1	2	10	-31.83	-71.52
El Mauro			3	10	-31.98	-71
San Carlos de Apoquindo	3	3	4	11	-33.46	-70.48
Penaflores	3	1			-33.57	-70.82
Lo Herrera	3	1			-33.57	-70.67
Quebrada de la Plata	4	1			-33.49	-70.89
Melipilla	5	1			-33.73	-71.21
Quilamuta			5	8	-34.06	-71.29
Picarquín	6	1			-33.96	-70.63
Nancahua	7	1			-34.6	-71.2

Curicó	8	1	21	1	-34.59	-71.19
San Fernando	9	1			-34.76	-70.77
Duao	10	2	6	10	-34.88	-72.15
Los Ruiles	11	1	7	10	-35.83	-72.5
Chillán	12	2			-36.65	-71.99
Tomé	13	1	8	10	-36.64	-72.79
Concepción	14	1			-36.78	-73.01
Tucapel	15	1	9	9	-37.24	-71.79
Quilleco	16	2			-37.45	-71.97
Los Angeles	17	1			-37.56	-72.54
P.N. Nahuelbuta			10	7	-37.79	-73
Carahue	18	1	11	6	-38.52	-73.11
Temuco	19	1			-38.69	-72.61
P.N. Huerquehue	20	1	22	1	-39.17	-71.73
P.N. Villarrica	21	1	12	12	-39.45	-71.81
Neltume	22	1			-39.57	-71.77
Panguipulli	23	2	13	11	-39.73	-72.22
Puyehue			14	10	-40.72	-72.43
Chiloé	24	1	15	11	-41.88	-73.67
Aysén	25	2			-45.4	-72.7
R.N. Río	26	2	16	9	-45.46	-72.32
Simpson						
Lago Atravesado			17	9	-45.67	-72.32

Coyhique	27	3			-45.57	-72.06
RN. Río Ibañez			18	10	-46.18	-72.77
Chile Chico	28	2	19	10	-46.78	-72.6
Torres de Paine			20	12	-51.28	-73.09

Table S2: Selection analyses of ANDV S segment performed in Datamonkey and Selecton servers using 20 sequences and 921 nucleotides.

DataMonkey							SELECTON					
SLAC		FEL		REL		PARRIS	GA-Branch	M8a	M7	M5	M8	MEC
Selected sites	dN/dS	Selected sites	dN/dS	Selected sites	dN/dS	dN/dS		Ka/Ks	Ka/Ks	Ka/Ks	Ka/Ks	Ka/Ks
63	0.004 05	134	0	196	0	0.004 ± 0.00	0.0027 ± 0.0056	0.0233 [1.7e-11,0.21]	0.0219 [1.7e-11,0.21]	0.0229	0.025	0.04

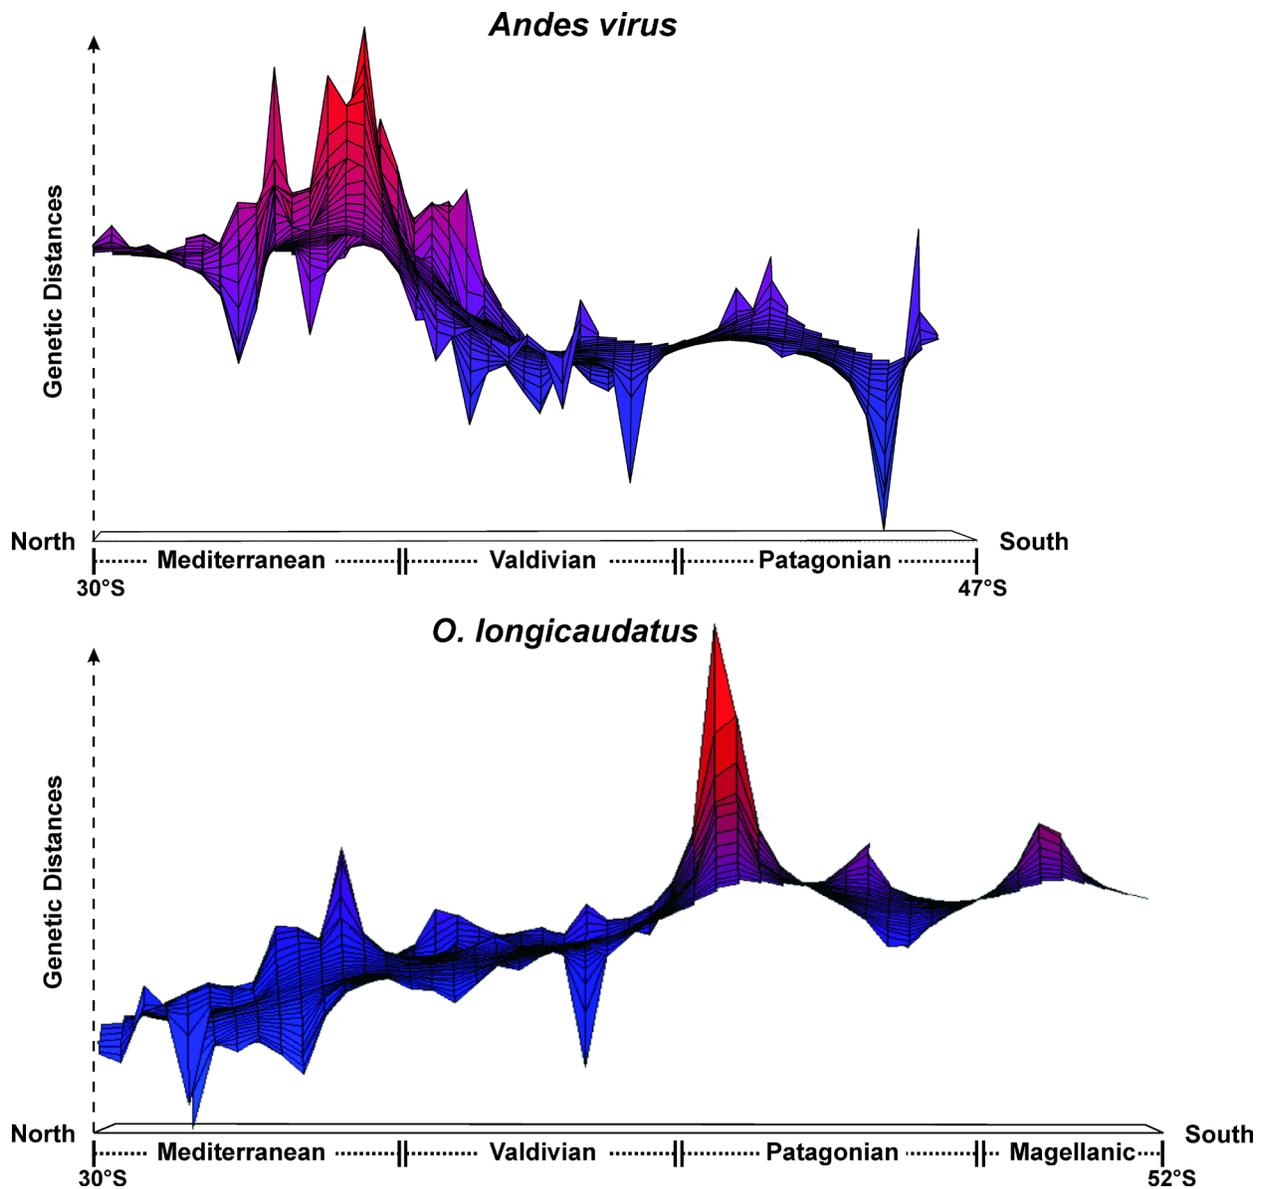

Figure S1. A graphical interpolation-based representation of the genetic structure made using a 50 x 50 grid and a distance weighting parameter of 0.5 for ANDV and 1.0 for *O. longicaudatus*. X- and y- axes represent geographic coordinates. Surface heights along the Z-axis indicate genetic distances. Colors are indicative of areas with high (red) or low (blue) pairwise genetic distance between individuals. All samples (197 sequences) were included for *O. longicaudatus*. Scale at the bottom represents latitude in degrees.
