Corrigenda

Isolation and mapping of a polymorphic DNA sequence, DXS312, to Xq27-Xq28

Nucleic Acids Research, 17, 4421

Dr A.V.M.Duncan wishes her name to be withdrawn from the author list of the above paper.

DNA amplification of a further exon of Duchenne muscular dystrophy locus increase possibilities for deletion screening

by A.Speer, A.Rosenthal, H.Billwitz, R.Hanke, S.M.Forrest¹⁺, D.Love¹, K.E.Davies^{1*} and Ch.Choutelle

Nucleic Acids Research, 17, 4892 (1989)

Institute of Molecular Biology, Department of Cell Differentiation, Academy of Sciences of GDR, Robert Rossle Strasse 10, 1115 Berlin, GDR and ¹Molecular Genetics Group, Institute of Molecular Medicine, John Radcliffe Hospital, Headington, Oxford OX3 9DU, UK

⁺Present address: The Murdoch Institute, Flemington Road, Parkville, Vict. 3052, Australia
