

Supplemental Figure 2 Montage image of TPP1 distribution. Fifteen week-old *Tpp1*(*-/-*) mice were administered three daily 80 μ L infusions of artificial CSF (vehicle) or 10 μ g/ μ L rhTPP1 (enzyme) and killed 24 hours after the final dose. Sagittal sections immunostained with anti-TPP1 monoclonal antibody and Alexafluor 555 conjugated donkey-anti-mouse IgG were visualized using a Nikon Eclipse 80i with a 4x objective.
