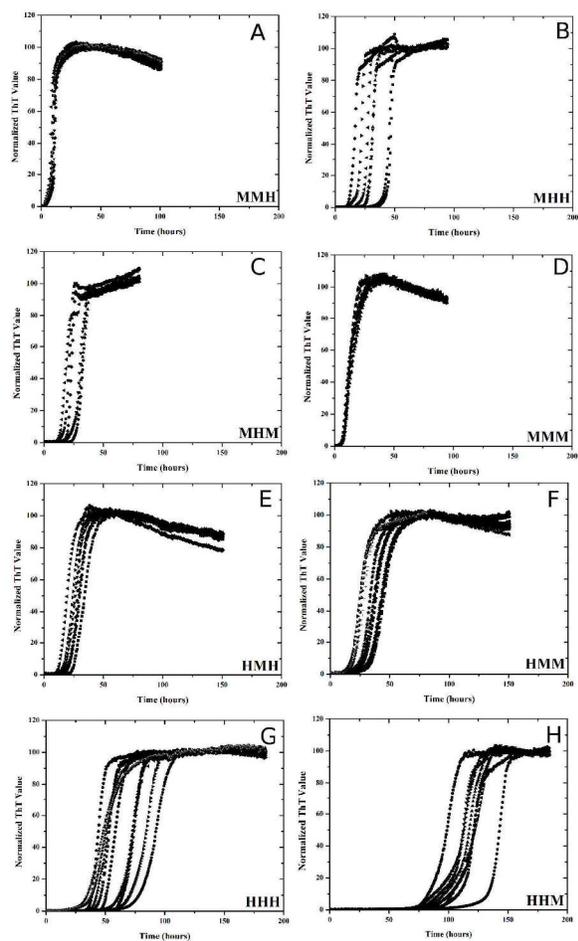

Figure S1. The normalized time course fibril growth curves for all the α Syn variants. MMH (A), MHH (B), MHM (C), MMM (D), HMH (E), HMM (F), HHH (G) and HHM (H) are shown in each panel.

Table S1. The alignment of 27 complete α Syn sequences generated by BLAST and aligned with ClustalW2. The common name and primary access number of each sequence is shown in the first column. Human and mouse α Syn are highlighted with blue and yellow separately. The seven different residues between human and mouse α Syn are marked in red.
