Supplemental Figure 2: V272L mutant, but not K245A or ΔCC, is viable when expressed in BS16 strain. A. Western blot assay showing expressions of wild-type and mutant SUV3s. ARP3 serves as a loading control. **B.** Growth assay showing the survival of cells expressing null (vector) or HA-tagged wild-type SUV3, K245A, V272L, and ΔCC on galactose and glycerol containing -Leu plates.
