

Figure S6. Autophagy-related genes are not altered in E2F-1^{+/+} and E2F-1^{-/-} mice after I/R injury. Quantification via real-time PCR analyses of Gabarapl1, LC3 and Atg12 mRNA expression in E2F-1 hearts after I/R injury. Minimal changes in mRNA expression were noted between genotypes or in response to I/R. n=3-4 per group.
