

Figure 2. Prevalence of astigmatism ( $\geq 1.00$  diopter (D), Figures 2A and 2B) and high astigmatism ( $\geq 2.00$  D, Figures 2C and 2D) at 4, 5 and 6 years postnatal age as related to location (zone) of the most severe acute-phase retinopathy of prematurity (ROP) in each eye. Numbers above each bar indicate the number of eyes that provided data at each age.
