

Supplemental Figure 1 (a) Gel filtration of BGLPf on Hi-Load 26/60 Superdex 200 pg. Gel filtration of BGLPf gave a single peak. (b) Gel filtration of calibration on Hi-Load 26/60 Superdex 200 pg. Standard proteins (ovalbumin, conalbumin, aldolase and ferritin) and BGLPf are shown by black and red plots, respectively. Molecular weight of BGLPf was estimated to be 238.8 kDa.
