

**Table S2. Cell volume correlates strongly with surface area, eccentricity and surface area:volume across colonies isolated at generations 1023 & 1302**

	r	statistic
volume & surface area	0.999	$t_{21}=108.6, p<0.00001$
volume & eccentricity	0.857	$t_{21}=7.60, p<0.00001$
volume & surface area:volume	-0.991	$t_{21}=-34.5, p<0.00001$
