

Table S3. Characteristics of tumors obtained from mice injected with C4HD cells transfected with 2'-O-methyl siRNAs.

Mouse group¹	Mitotic Index²	Necrosis (%)	Fibrosis (%)	Infiltration
Untreated	GM3	20-40	10	None
CONT2	GM3	40-60	20	None
ADT	GM1	40	30	Lymphocytes and PMN ³

¹Number of mitotic bodies per high power field (HPF). ²GM1-2 indicates 0-5 mitosis per 10 HPF; GM3 indicates > 10 mitoses per 10 HPF. ³Polymorphonuclear neutrophils.
