Supplementary figure 1

**Supplementary figure 1**
Optimal peptide recognition in HLA-B*5702, B*5703 and B*5801 expressing individuals. IFNγ elispot responses expressed as % responders (x-axis) to 8 optimal peptides shown on y-axis. Significant differences between HLA-B*5703 and B*5801 are indicated (Fisher's Exact test) (* p<0.01).
