

Supplemental Figure 11. Calcium and phosphate deposition by iMSCe2-FV clones. Alizarin red and Von Kossa staining of gene-targeted iMSC clones (iMSCe2-FVc1 and iMSCe2-FVc3) and transgene-free (Cre-treated), gene-targeted iMSC clones (iMSCe2-FVc5 and iMSCe2-FVc6) cells grown in osteogenic medium (osteo) or MSC medium (undifferentiated).
