

Supporting Information

Yarov-Yarovoy et al. 10.1073/pnas.1118434109

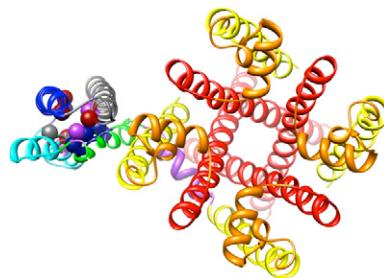

Supporting Information Corrected January 23, 2012

Movie S1. View of the conformational changes between the Resting State 1 and Activated State 3 of NaChBac from the side of the membrane. Only a single voltage-sensing domain is shown attached to the tetramer of pore domain for clarity. The models represented are as in Fig. 5B. [Movies S1, S2, and S3](#) were generated using the University of California at San Francisco Chimera package (1).

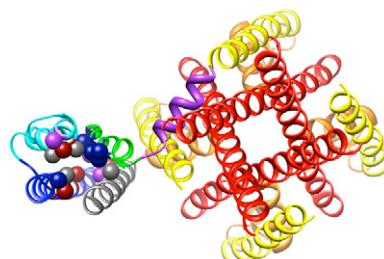

[Movie S1](#)

1. Pettersen EF, et al. (2004) UCSF Chimera—a visualization system for exploratory research and analysis. *J Comput Chem* 25:1605–1612.

Movie S2. View of the conformational changes between the Resting State 1 and Activated State 3 of NaChBac shown in [Movie S1](#) from the extracellular side of the membrane.

[Movie S2](#)

Movie S3. View of the conformational changes between the Resting State 1 and Activated State 3 of NaChBac shown in [Movie S1](#) from the intracellular side of the membrane.

[Movie S3](#)
