#### **Contents**

*Supplementary Material, Table 1.* List of human chemical-protein associations extracted from ChemProt. (pp. 2-5)

*Supplementary Material, Table 2.* List of inflammatory, reproductive, neurodevelopmental and cancer diseases predicted to be linked to chemicals using CTD ( $p$ -value adjusted for multiple comparisons) and OMIM (unadjusted  $p$ -value). All associations with  $p$ -values superior to 0.5 are show with the number of gene/protein., where the source corresponds to the database used for the prediction: min ids are OMIM ids and mesh ids are from CTD. (pp. 6-12)

Supplementary Material, Table 1: List of human chemical-protein associations extracted from ChemProt.
