

SUPPLEMENTARY MATERIAL

Supplementary Figure Legends

Fig S1. Western blot analysis of cytosolic, nuclear and mitochondrial extracts from HEK293 cells stably expressing NEIL2-FLAG. RNAP II, LDH and 70kDa subunit of complex II (C II-70kDa) were used as nuclear, cytosolic and mt markers, respectively, to show the purity of mt preparations. Lysed cytosolic, nuclear and mitochondrial fractions were loaded in equal amount (30 µg).
