Table S1

Table S1. Distribution of A:B ratios*

Genotype		A:B ratio†				
Allele 1	Allele 2	Median	Minimum	Inter-quartile Range	Maximum	n
<i>SLC44A2*1</i>	<i>SLC44A2*1</i>	2901	51	1173 to 7744	100,932	756
<i>SLC44A2*1</i>	<i>SLC44A2*2</i>	1.8	0.4	1.2 to 2.9	23.9	156
<i>SLC44A2*2</i>	<i>SLC44A2*2</i>	0.005	0.0005	0.002 to 0.02	0.099	50
Total						962

* This table includes ratios of the 334 samples and 39 repeat samples for this study, 46 control samples, and 62 additional samples that were not part of the study; all samples were run in duplicates.

† The ratio was calculated as described in Materials and Methods.
