

Supplementary information, Figure S2

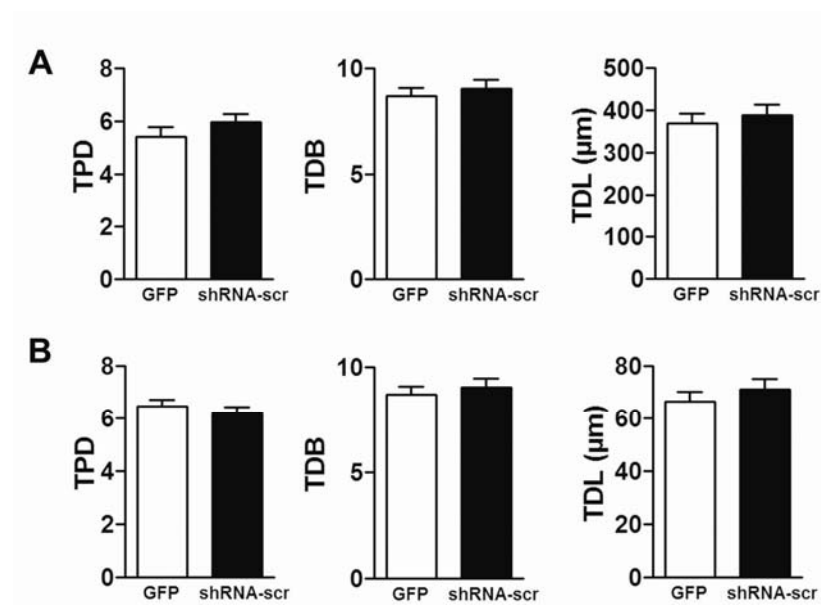

Figure S2 shRNA-scr has no effect on dendritic arborization. **(A-B)** The dendritic arbors of DIV3 **(A)** and DIV6 **(B)** neurons transfected at DIV0 with shRNA-scr and GFP did not differ from those of neurons transfected with GFP alone. TPD: total number of primary dendrites. TDB: total number of dendrite branch ends. TDL: total dendrite length. Data represent mean \pm SEM.
