

Liang et al

Supplemental Table 1.

Listed below are the numbers of male and female samples for each genotype at each age used in the analyses of biomechanical and geometric properties. After body weight adjustment, no apparent gender effect was observed at 1 month of age.

Age	Male	Female
1 month	WT, 6; TG, 4	WT, 3; TG, 5
2 months	0	WT, 5; TG, 6
4 months	0	WT, 3; TG, 4
6 months	WT, 4; TG, 6	0
