

Supplementary Figure 1

Supplementary Figure 1. Representative images of AoSMCs showing BrdU incorporation after Raf-I depletion and TNF- α and PDGF stimulation. A non-targeting siRNA was used as control. Data is shown as graph in Figure 3D.

Supplementary Figure 2

Supplementary Figure 2. Representative images of AoSMCs showing BrdU incorporation after E2F1, E2F2, E2F3 depletion using siRNAs and TNF- α and PDGF stimulation. A non-targeting siRNA was used as control. Data is shown as graph in Figure 6D.
