

Whole Exome Variant Description

Supplemental Figure 1: Description of variants found in whole exome sequencing of the proband.

Supplemental Figure 2: Visual representation of next generation sequencing data using Integrative Genomics Viewer. The top panel shows the chromosome ideogram with the visualized coordinates below. The grey bars represent individual sequence reads mapped to this region of the genome. The small black lines indicate the 3 base pair deletion found in each read. The reference sequence is present in the bottom panel.

Supplemental Figure 3: Correlation between 24,25-dihydroxyvitamin D and 25-hydroxyvitamin D levels in 8 control subjects ($r=0.86$, $p=0.003$ based on linear regression).
