

Figure S1. Antibodies used in this study are specific for the corresponding protein. (A) HEK 293T cells were transfected with the indicated gene-specific siRNA. After forty-eight hours, cells lysates were separated by SDS-PAGE and analyzed by Western blotting with the indicated antibody. (B) HEK 293T cells were transfected with the indicated gene-specific siRNA. After forty-eight hours, nucleolar extracts were separated by SDS-PAGE and analyzed by Western blotting with the indicated antibody.
