

## Notice of inadvertent duplicate publication

---

It has come to our notice that a paper we published in *Epidemiology & Infection* contained a substantial amount of previously published material. The full reference of the paper in question is:

**Hunter, P. R. and Syed, Q.** (2002). A community survey of self-reported gastroenteritis undertaken during an outbreak of cryptosporidiosis strongly associated with drinking water after much press interest. *Epidemiology and Infection* **128**: 433–438.

The full reference of the previous paper is:

**Hunter, P. R. and Syed, Q.** (2001). Community surveys of self-reported diarrhoea can dramatically overestimate the size of outbreaks of waterborne cryptosporidiosis. *Water Science and Technology* **43**: 27–30.

We apologize unreservedly to the publishers of *Water Science and Technology* for breaching their copyright.
