

**Supplementary Figure 1.** Influence of reducing agents on R1-NB activity assayed by TLC. **A.** 10.0  $\mu\text{M}$  R1-NB was assayed in the presence of 1 mM ADP at increasing concentrations of dithiothreitol ( $n=3$ ). **B.** 10.0  $\mu\text{M}$  R1-NB was assayed in the presence of 1 mM ADP at increasing concentrations of monothioglycerol ( $n=4$ ). \*  $p < 0.05$ , \*\* not significant.
