

Table S1. Software summary

Software	Primary analysis functions used	Software version
R		1.12.1, 64-bit
MASS (R package)	<i>lda</i> (linear discriminant analysis)	7.3-9
e1071 (R package)	<i>tune.svm</i> , <i>tune.rpart</i> , <i>tune.randomForest</i> , <i>tune.nnet</i> (cross-validated parameter tuning), <i>svm</i> (support vector machines)	1.5-24
rpart (R package)	<i>rpart</i> (classification and regression trees)	3.1-48
randomForest (R package)	<i>randomForest</i> (random forests)	4.6-2
caret (R package)	<i>pcaNNet</i> (ANN with principal component analysis, uses <i>nnet</i> package to build ANN)	4.73
