

Supplementary Data Table T1. Analysis of AJAP1 deletion, expression, and methylation in 80 primary glioblastoma tumor samples. NB=normal brain, N=normal gene expression (0.9-1 relative to NB), I=intermediate gene expression (0.3-0.89), L=low/absent gene expression (0-0.29), LOH=loss of heterozygosity, HOMO=homozygous loss.

Primary tumors	Mutation	Deletion	Expression level	Expresion=		MS-qPCR
