

Supplemental Figure 3: Total and phosphorylated levels of PAK1 in HMLE derivatives or breast cancer cell lines. A. Immunoblots showing total or phospho-PAK1^{T423} in HMLEs expressing a control vector, PAK1, PAK1^{K299R} or HRAS^{V12}. B. Immunoblots showing total and phospho-PAK1^{T423} levels in cell lines with (RED) or without (BLACK) *PAK1* amplification.
